

PHD-8VX Firmware Upgrade Instructions

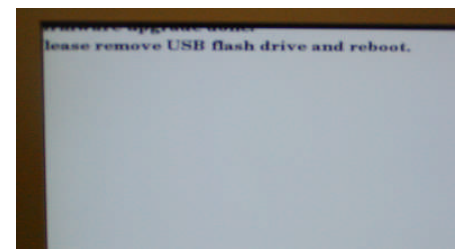

Firmware Ver. **8VX.43.13.23**:

- EPG improvement using GUIDE button.
- Channel scan and video switch improvement.

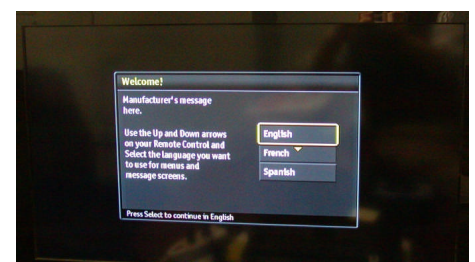

- (1) Unzip firmware file, (PHD 8VX Firmware-xxx.xx.xx.zip), and copy all files to root directory of USB Flash stick.
- (2) Turn the unit completely off (push left side POWER button and see no LED lights on the front panel).
- (3) Firmware upgrade process can be monitored from TV screen. In order to do that, please make sure to connect HDMI cable from TV to PHD-8VX HDMI output.
- (4) Insert USB stick to PHD-8VX USB port as shown on the picture.
- (5) Turn the unit on by pushing POWER button. Then, push "STANDBY" button on the right side of front panel.
- (6) You should see the first firmware upgrade screen up right away as shown. The front panel LED readout is also displaying "boot".
- (7) Wait until you see "Please remove USB flash and reboot." screen showed up. Then, press POWER button to turn off the unit. Or, just wait until the unit self-reboot. Then, Unplug USB Flash stick. The initial set up screen will be displayed on screen.

Reading from usb drive and then flashing...

Please remove USB flash and reboot.

Initial screen after Firmware upgrade.
(Auto-set to 720p output default resolution)
